

CFD platform start guide

An introductory guide to
CMC Markets' Next
Generation trading platform

Spread bets and CFDs are complex instruments and come with a high risk of losing money rapidly due to leverage. **67% of retail investor accounts lose money when spread betting and/or trading CFDs with this provider.** You should consider whether you can afford to take the high risk of losing your money.

See some of the many features available within the platform below. As the platform is completely customisable, you can choose which features to have in your default layout, depending on your trading preferences.

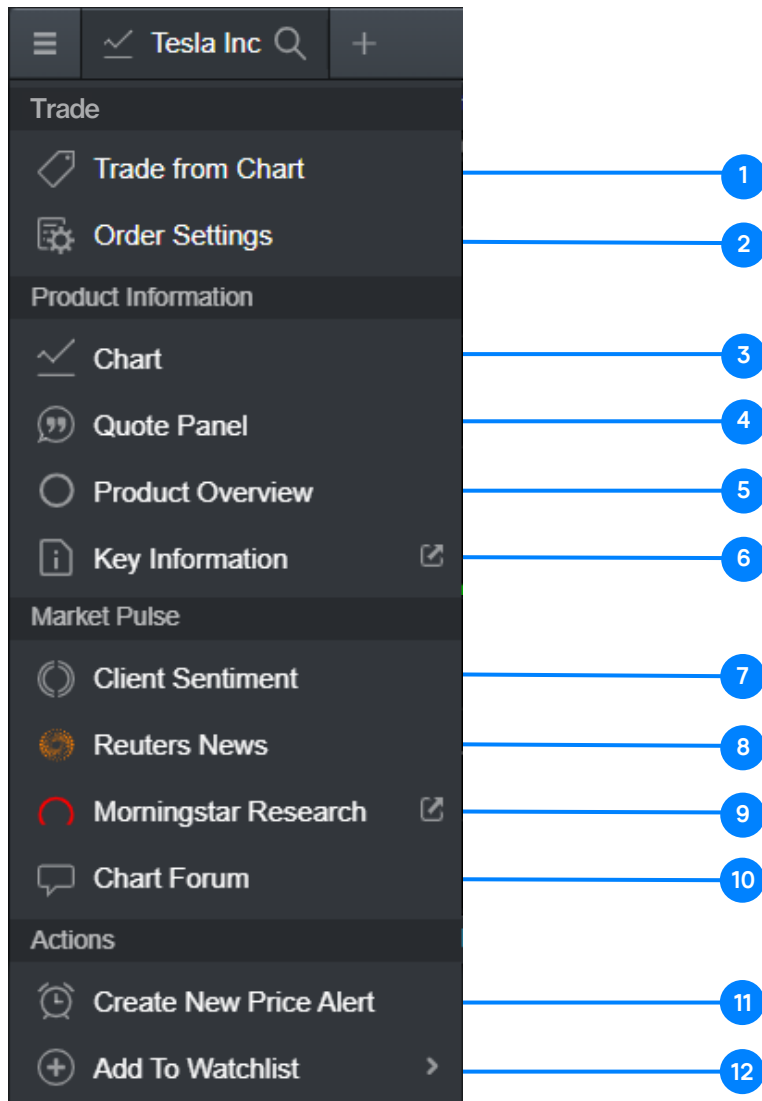

The screenshot shows the main navigation menu of the CMC Markets platform. On the left is a vertical 'Navigation Toolbar' with icons for 'My Accounts', 'Live Help', 'Support', 'CMC Pro', and 'Funding'. The main navigation menu is a horizontal bar with the following items: a search icon, 'Home', 'Multi-Chart', 'Trade Signals', 'Sentiment', a plus icon, 'Products', 'Watchlists', 'Account', 'News & Analysis', 'Pattern Scanner', 'Learn', a settings gear icon, and a window icon. Eight blue circles with numbers 1 through 8 are connected by lines to specific items in the menu: 1 points to the search icon, 2 to 'Products', 3 to 'Watchlists', 4 to 'Account', 5 to 'News & Analysis', 6 to 'Pattern Scanner', 7 to 'Learn', and 8 to the window icon.

Main navigation menu

Navigation toolbar

To find your way around the platform, there are two main menus. Using the navigation menu, you can access the main features of the account and platform, while the product menu contains a host of features related to specific instruments.

1. Products – access all the instruments available on the platform. Learn more about searching for products on page 8.
2. Watchlists – create your own watchlist and quickly access the instruments you’re interested in. See how to build watchlists on page 16.
3. Account – monitor your account, set up price alerts and access statements. Learn more about monitoring your account on pages 12-14.
4. News and analysis – find CMC Insights, market commentary, our market calendar, and pattern recognition tool. Learn about these features on pages 24 and 25.
5. Pattern recognition scanner - Set up the pattern recognition scanner to receive potential trade setup alerts.
6. Education – view pdf and videos trading guides, as well as our webinars and seminars.
7. Settings – access account, order, and notification settings, update your password, and set up two-factor authentication. Find more details on pages 27 and 28.
8. Windows – see a list of all currently opened windows, so if one is hidden you can easily identify it.

Product menu

1. Place trades directly from a chart. Learn more on page 15.
2. Create settings for specific instruments. Find more details on page 27.
3. Access the instrument's chart and technical analysis tools. Find more details on page 18.
4. Open a small window with product quotes for quick access to the instrument.
5. Find key product details like margin rate and trading hours. Find more details on page 9.
6. Access the Key Information Document.
7. View client sentiment data. See more information on page 26.
8. See Reuters news stories relating to the instrument.
9. Morningstar quantitative equity research, available on most shares, shows current cash fundamentals including a fair value estimate.
10. Share ideas and engage with like-minded clients and analysts in our chart forum.
11. Create a price alert for the specific instrument. Find more details on page 21.
12. Add specific instruments to a new or previously-created watchlist. Learn more about watchlists on page 16.

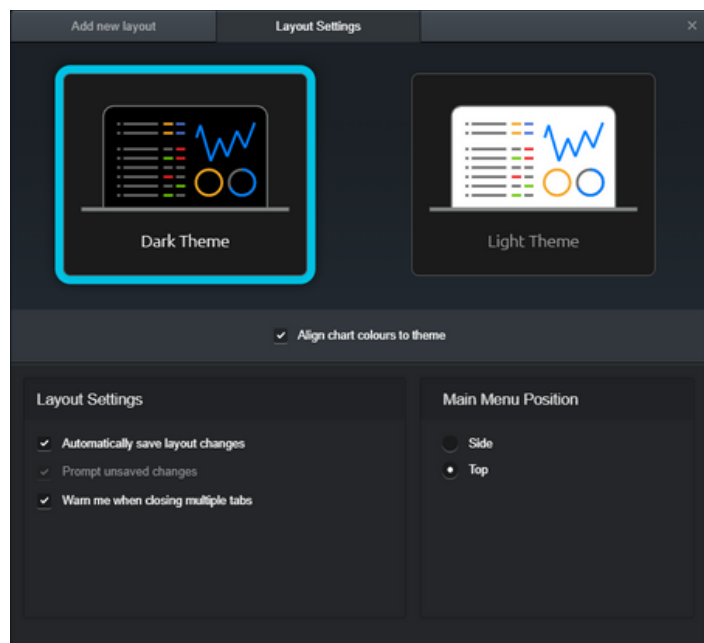

Platform and layout configuration

Our trading platform is fully customisable. Configure the layout at any time from the icon highlighted, or by selecting 'Layout Settings' from the 'Settings' menu.

Ensure you set up your trading account to suit your individual needs by using the inbuilt account preferences.

a. Configure your preferred order settings globally, by asset class or by specific products. Personalise settings on default trade size, boundaries, forward settlement behaviour, one-click trading, execution alerts, stop-loss orders, take-profit orders, limit orders and stop-entry orders.

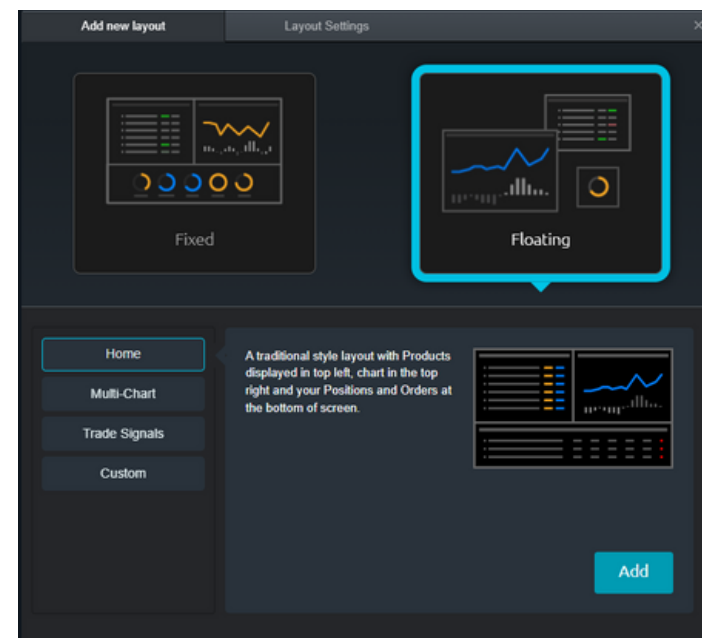

b. Disable 'Account Netting' to place separate long and short trades on the same product at the same time. Select your preferred account close-out method. Choose between 'standard account close-out' or 'alternative account close-out' ('last in, first out', 'largest position margin first' or 'largest position loss first').

◀ Choose a dark or light theme, the main menu position, and add the option of automatically saving changes.

Add a new layout from the top left. Having different layouts allows you to separate work spaces for differing strategies or asset types. You can also select fixed or floating layouts and choose from set design options (home, multi-chart, trade signals or custom), or configure your own. ▶

You can also choose to have the main menu options and grid lines to the side or at the top.

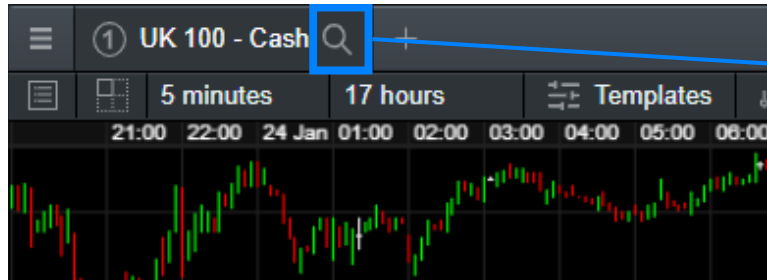

3. Platform & layout configuration

When you're configuring the layout, you can also link or group together the majority of the modules that you've opened in your layout (for instance the watchlist chart, order ticket and chart). This will allow you to navigate the platform features and analyse other products. To link the modules, choose the same colour by selecting the boxes at the top right of any module.

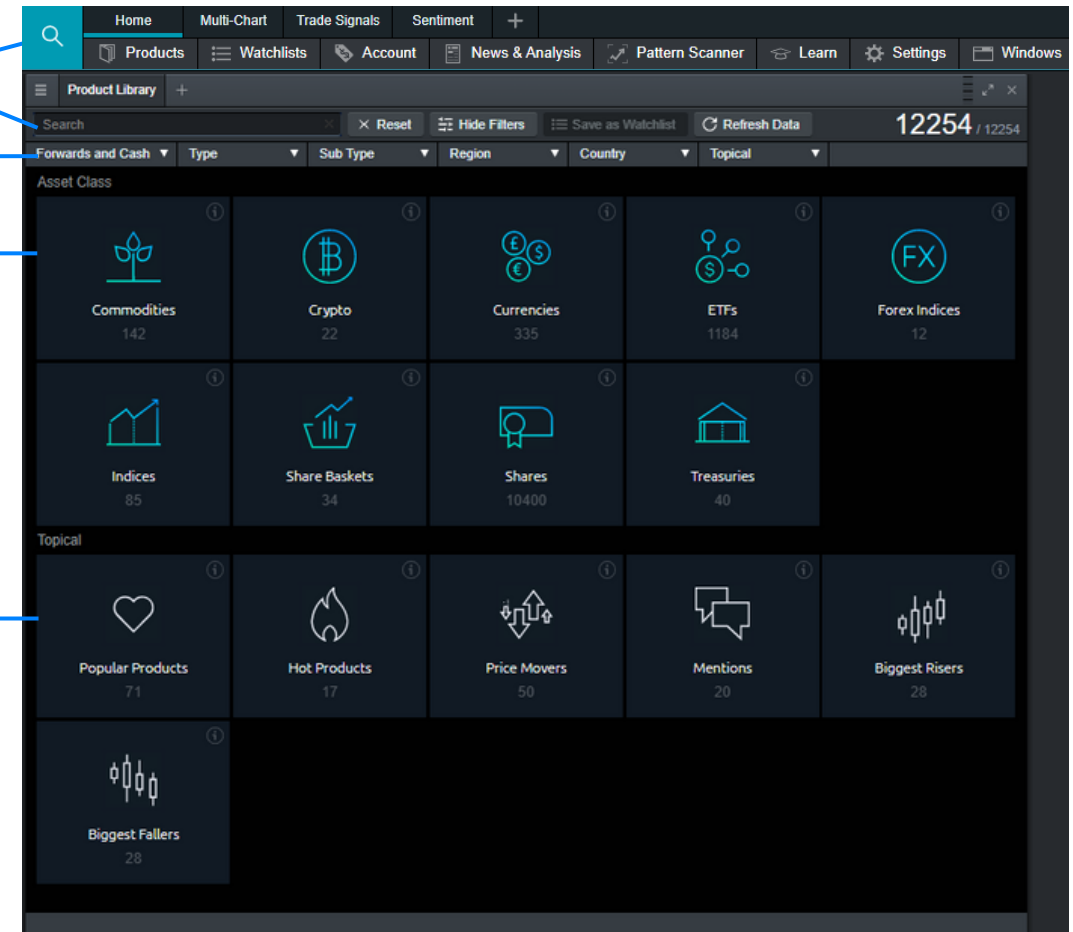

◀ Here you can see that all the features are linked by the blue colour. When several modules are linked together, changing the instrument in one will automatically show the linked modules of your choice as a shortcut, helping to save you time.

4. Product library & search

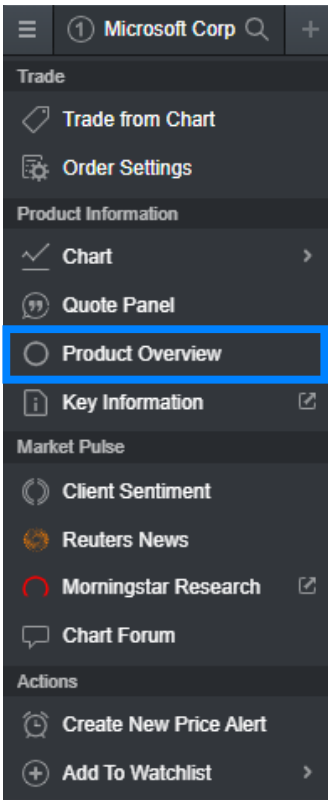

1. Search for one of over 12,000 available instruments
2. Filter for 'forwards' and 'cash' products, by regions and country
3. An overview of the different asset classes
4. The most traded and volatile instruments on the platform

Position Limits

Trade Quantity	0.01 - 2,629 units
Max Buy Position Limit*	78,858 units
Maximum covered by GSLO	1,051 units
Max Sell Position Limit*	78,858 units
Maximum covered by GSLO	1,051 units

* For larger sizes please contact our Client Management Team.

Guaranteed Stop Loss Orders (GSLO) [Learn more](#)

GSLO Premium*	0.6113 USD per unit
GSLO Minimum Distance	6,112.88 pts / 0.62 EUR

* If an open order is closed without utilising an attached Guaranteed Stop Loss Order, then 100% of the GSLO Premium will be refunded to your account.

Order Clustering

Order Cluster Limit (1)	2,629 units
Maximum covered by GSLO	1,051 units
Order Cluster Range (2)	0.5%

(1) The maximum total quantity allowed across all orders falling within a single Order Cluster Range.

(2) The range around the price of any given Order, excluding Market Orders, within which other Open Orders in the same direction will be considered as part of an Order Cluster.

Expressed as:

- Points, the range is defined as a total number of points within which Orders must not exceed the Order Cluster Limit.
- Percentage, the range is defined as a percentage multiplied by the price of the requested Order.

Trading and position limits shows the types of orders available for the instrument, as well as the maximum trade quantity or maximum limit for both buy and sell positions.

All applicable costs (spreads, commission, and holding costs) are shown in the product overview, as well as trading hours and the margin required to open a position.

Holding costs are shown as an annual percentage separately for buy and sell positions. Select 'view historical rates' to see the holding cost rates over the past month.

7.5 Statement centre

Download daily, monthly, or yearly trading statements. Have them emailed to you, or to third-party email addresses.

8. Trading from charts

The platform includes an array of advanced order features for greater control, flexibility, and customisation over your trade execution.

- Open, close, and amend orders directly from charts, and view levels against historical price action.
- Open the product options menu in the top left of the chart (three horizontal lines) and then choose 'Trade from Chart'.
- The order ticket appears automatically to the right of the chart window.
- You can now enter the following data: for units, enter the position size, or the desired trade amount. From the 'Market' button, you can define your order type (market, limit or stop-entry).
- As soon as you click on 'Stop Loss' and/or 'Take Profit', these appear as a green line (TP) and a red line (SL) in your chart. You can move these lines with your mouse. At the same time, the stop loss and take profit amounts are updated in the order window, so you can see your pre-defined risk and profit potential.
- After you select 'Place Buy Market Order', a control window appears in which you can confirm your order for the last time. By selecting the blue triangular trade icon on the chart, you can drag your stop-loss and take-profit levels to change them once the trade is live.
- You can turn the trade plot on and off by selecting the two small arrows in the lower left corner of the chart window (show/hide trades).

The order ticket shows you the following additional information:

- The estimated amount of margin for the trade
- The potential costs for the trade, divided into spread and overnight holding costs
- The key information document pdf

Build you own list of instruments for easy access to the markets you're interested in. Create new watchlists from either the navigation or individual product menus. Add new instruments to a watchlist by dragging and dropping from another list, by adding the '+' symbol, or from an individual instrument menu.

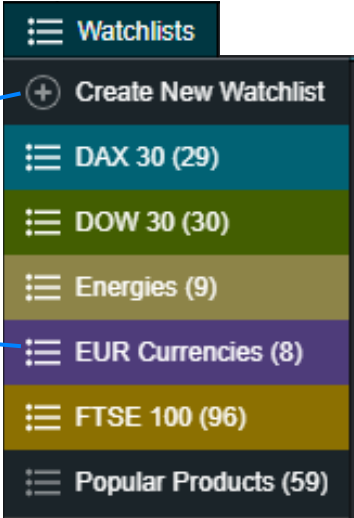

Instrument menu

Create a new watchlist

Open an existing watchlist

Menu principal

9. Watchlists

1. Open a watchlist's settings
2. Add new products to the watchlist
3. Type the name of your watchlist
4. Choose a colour for the watchlist heading. All windows (charts, sentiment, order tickets etc) opened from that watchlist will be displayed with that colour heading
5. Choose between four different views
6. Open a price ticker
7. Open a Reuters newsfeed related to your watchlist's instruments
8. Delete instruments from your watchlist
9. Delete a watchlist
10. Edit your watchlist table and choose which columns you want to include

The screenshot shows the 'Popular Products' watchlist interface. The left sidebar contains settings, and the main area displays a table of products with various columns. Numbered callouts point to specific features:

- 1: Watchlist title 'Popular Products' and search icon
- 2: Add new products button (+)
- 3: Watchlist name input field
- 4: Watchlist color selection buttons
- 5: View selection (Classic Table)
- 6: Price Ticker button
- 7: Reuters News button
- 8: Remove Products button
- 9: Delete button
- 10: Edit Table button

- a. Open the options menu to access product-specific information, chart forum, client sentiment, Reuters news and much more
- b. Open a value box area to see the open, high, low, and close values, plus greater detail on technical indicator values
- c. Change the interval and timeframe of your chart history using a selection of options
- d. Save up to five charts for each instrument and access them at any time
- e. Choose between different chart types, including candlestick, renko, and point-and-figure charts
- f. Change settings, customise your technical indicator and view chart education
- g. Set trading tools as a favourite by selecting the star icon
- h. Add a selection of drawing tools to your chart to identify strategic price levels and highlight areas of interest
- i. Add technical studies and overlays to your chart to identify potential technical trading setups
- j. Add technical pattern and candlestick recognition to your chart – see the results evolve in real-time
- k. Blue triangle: select to close or amend open or pending positions – you can edit risk-management orders directly on the chart
- l. Change the grid style
- m. Add the volume indicator to the chart from the show/hide tab within the settings menu
- n. Open chart settings to set chart defaults, presets, and other settings

Multi-interval charts

The multi-interval chart feature allows you to view up to four charts of varying intervals with a single 'click'. This means you can look at long-term versus short-term price movements simultaneously in your analysis. Access this feature via an icon in the top menu bar.

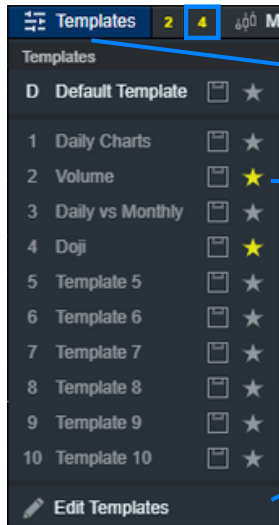

If you prefer different intervals, you can create a chart with the intervals you choose, and then save to one of the templates. For example, you can analyse the daily, 4-hour, 1-hour and 5-minute charts at the same time. The drawing tools and technical indicators you add on one chart will also be shown on the other charts.

1. Choose the 'Multi-Chart View Layouts' icon and pick your layout
2. For changing the timeframes on the charts, select a chart and change the timeframe, then select another chart and select the next timeframe. You can do this with all charts.

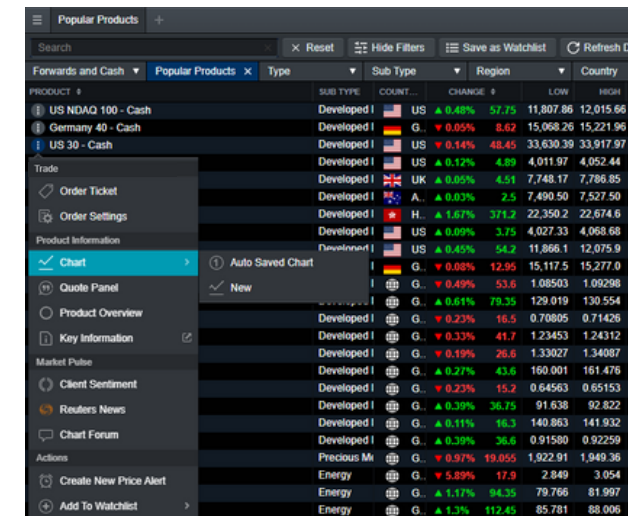

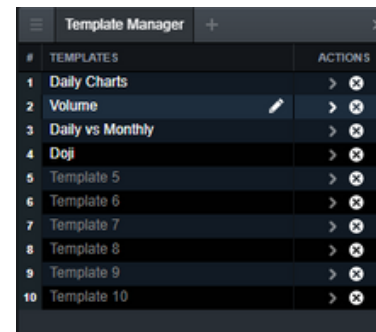

Saved charts

After you have created and set up your chart, you can save it as a template, call it up again quickly and transfer your default settings to other charts. This will save you a lot of time setting up new charts.

1. Select 'Templates' and save your settings by choosing the floppy disk icon
2. With 'Edit Templates' you can rename your saved templates
3. Add your chart templates to favourites by activating the star on the right-hand side.
4. For quick access to your template select '1' at the top

- The first chart that you open for an instrument will automatically be saved within the saved charts feature in position 1 and titled 'Auto Saved Chart 1'. You can edit the name of the saved chart by using the pencil icon.
- When using the saved chart menu in the chart module, selecting one of the saved charts (or the default chart) will replace the existing open chart.
- To open multiple saved charts for the same instrument, select the desired saved chart from the instrument's context menu.
- You can save up to five charts per instrument and access these through the context menu, or via a new icon in the header of the chart. When opening the chart from anywhere on the platform (such as main search or module search) or when using module linking, the last opened chart will be displayed by default.

Price alerts

Price alerts, which indicate that the price of an asset has reached a specific level, can be displayed as a notification on the platform, and can also be received by email, or as push notifications and SMS messages. Notification types can be changed in the settings menu under 'Notifications'.

The screenshot shows the 'Price Alerts' section of a trading platform. It features a table with columns for Product, Price, Type, Expires, Notes, Triggered, Points Away, Sell, Buy, and Actions. Four alerts are listed: Australia 200 - Cash, Euribor - Cash, GBP/JPY, and Gold - Cash. Callouts a through k point to specific elements: a (Instrument name), b (Alert price), c (Type dropdown), d (Expires date), e (Notes field), f (Points Away), g (Sell price), h (Buy price), i (New alert in same instrument), j (Copy icon), and k (Delete icon).

PRODUCT ▲	PRICE	TYPE ▾	EXPIRES ▾	NOTES	TRIGGERED ▾	POINTS AWAY	SELL	BUY	ACTIONS
⋮ Australia 200 - Cash	7,564.25	Buy ▾	27 Feb 2023		-	▲ 0.76% 57.75	7,502.50	7,506.50	+ ⌵ ✖
⋮ Euribor - Cash	97.404	Sell ▾	13 Apr 2023		-	▼ 0.00% 0.9	97.413	97.423	+ ⌵ ✖
⋮ GBP/JPY	161.204	Sell			26 Jan 2023 17:15	▼ 0.02% 3.5	161.239	161.264 ▲	+ ⌵ ✖ ↺
⋮ Gold - Cash	1,928.12	Buy			26 Jan 2023 17:16	▲ 0.03% 0.71	1,927.11 ▼	1,927.41 ▲	+ ⌵ ✖ ↺

- a. Instrument name

b. Alert price

c. Choose trigger price between mid, buy and sell

d. Choose time period

e. Notes

f. Distance between alert trigger level and current price
- g. Sell price

h. Buy price

i. New alert in same instrument

j. Copy

k. Delete

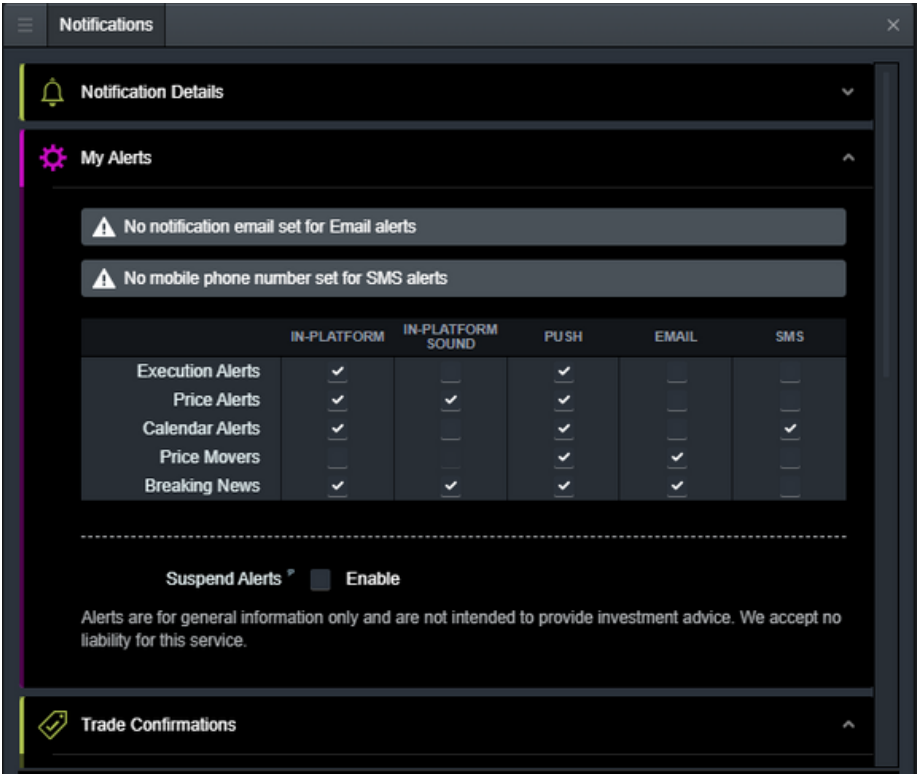

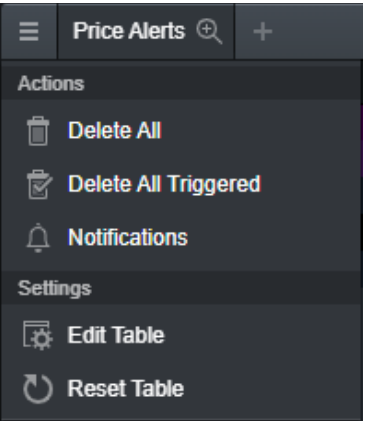

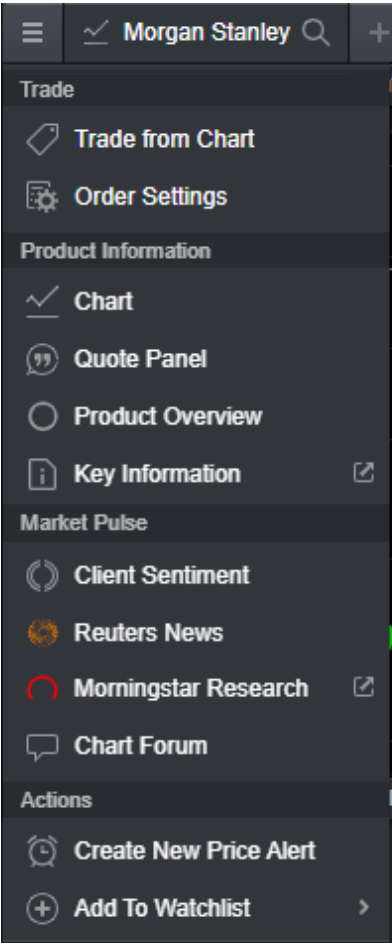

Price alerts

- From the instrument dropdown menu, select the 'create a new price alert' option
- You can select the type of trigger (buy, sell or mid) price, add a note, and specify the expiry date

Choose how to receive your price alerts from the 'Notifications' option

- Notification details allow you to set the phone number and email address where your alerts are delivered
- From 'My Alerts', you can set how each alert type is delivered

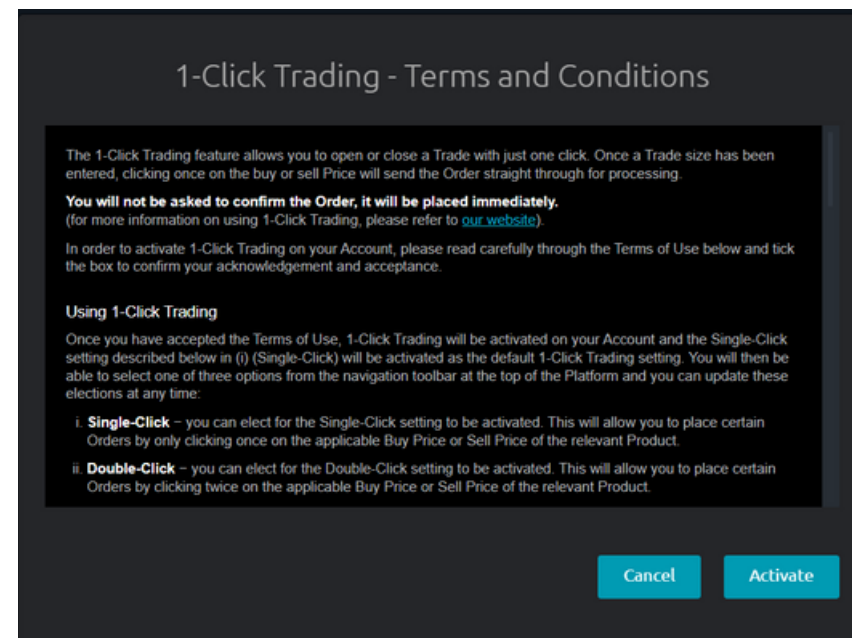

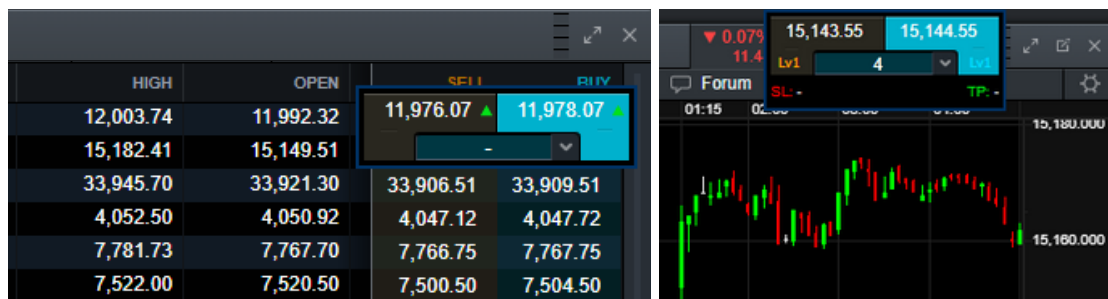

The '1-click trading' feature allows you to open or close a trade with a single 'click'. You can activate this feature by choosing the icon on the main menu or from the order settings.

Before activating this option, please review the information displayed in the platform. It's important for you to review all your advanced order settings as the one-click option will apply to any default units, stop-loss, limit orders and ranges that you have previously configured. Once activated, one-click trading is turned on for all price buttons by default. Activating for the first time will display the one-click trading terms and conditions.

Once a trade size has been entered, you can select the buy or sell price to send the order straight through for processing. This means that you will not be asked to confirm the order and it will be placed immediately. The purpose of one-click trading is to simplify the trading process and execute more trades at a faster pace. Particularly within volatile markets, it can be difficult to keep on top of trades.

Please read the T&Cs carefully before activating the feature.

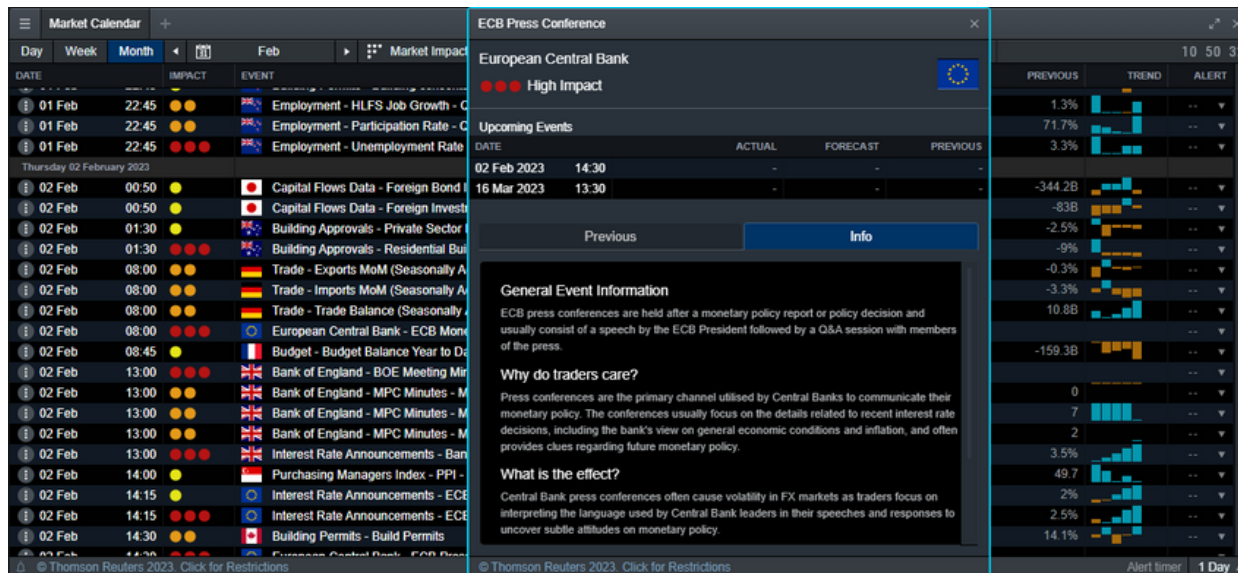

- Enter trade size manually or select from the dropdown menu
- Then just click the buy price or sell price to place the order
- By default your personal order settings, including stop-loss and take-profit order settings, will be applied to your one-click market order

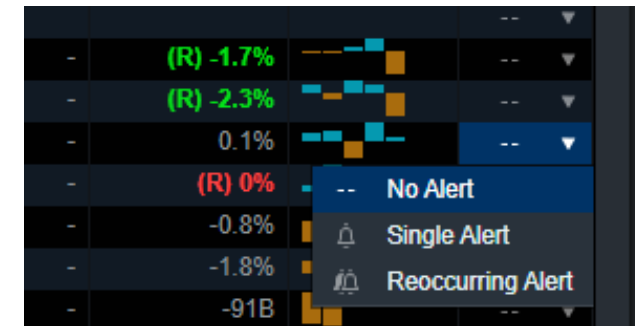

Select the 'News & Analysis' section in the toolbar to find out what's moving the markets.

- The Reuters news module feeds live headlines and articles across all asset types straight into the platform as they're published. Reuters news can also be filtered according to individual instruments from a watchlist.
- Insights displays a live stream of market updates direct from our team of global market analysts.
- The market calendar shows the latest economic data releases from across the globe, and you can set reminders for future updates in real time. Access the latest figures and historic trends, plus consensus forecasts and level of impact the data would be expected to have in the market.

▶ Schedule alerts to receive the data in real-time from the alert column.

The pattern recognition tool can identify significant trading patterns in financial markets, such as emerging and completed chart patterns, including wedges, channels and head and shoulders formations. Choose the instrument and interval in which you want to detect a pattern.

► Pattern performance

Check the validity of a given figure for an instrument within a specific range.

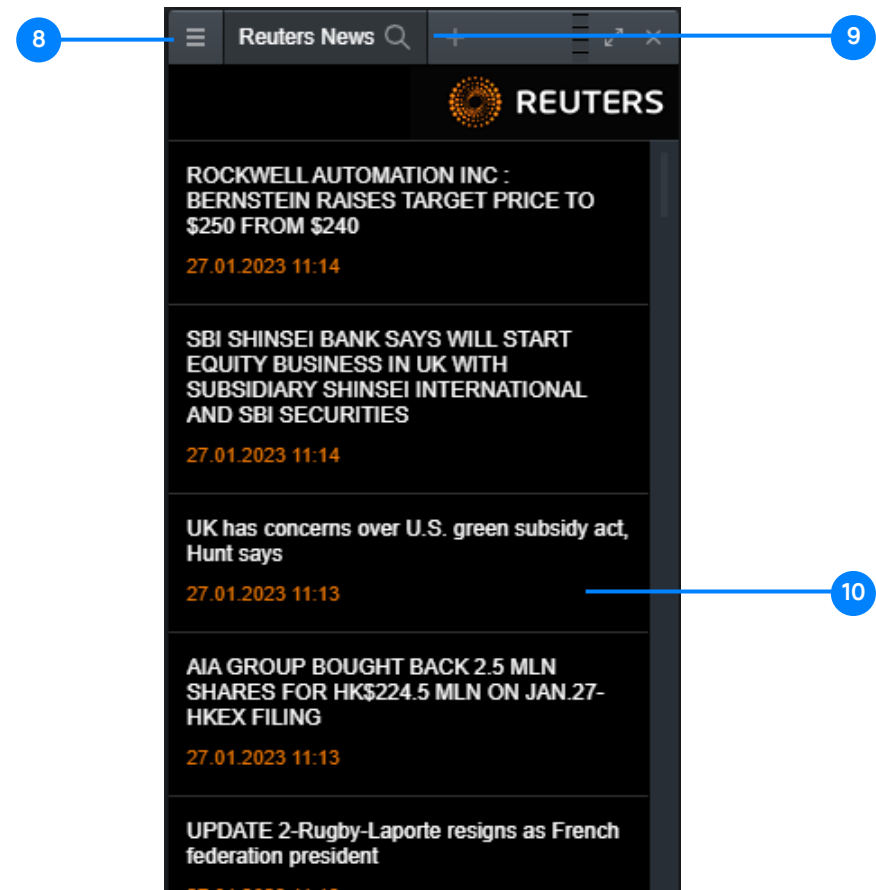

For breakout and emerging patterns and pattern performance, you can filter by chart formation, instrument and interval.

Client sentiment

1. Instrument name
2. All clients
3. Number of clients
4. Previous close
5. Position value direction

Reuters news

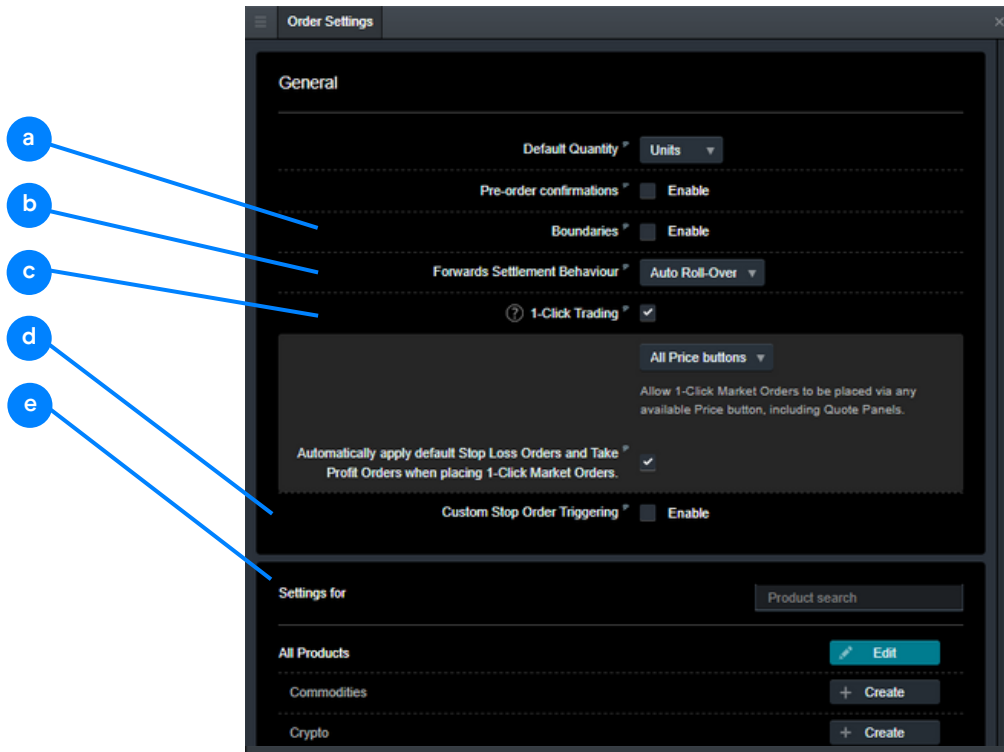

6. Percentage change in the instrument from the previous day
7. A simplified view of sentiment on our most popular instruments
8. Change filtering to a saved watchlist
9. Search for instruments to filter a newsfeed
10. Topic-filtered news

Set up your trading account to suit your needs with the numerous inbuilt account preferences.

16.a Order settings

Edit order properties, both for individual instruments and for an entire asset group.

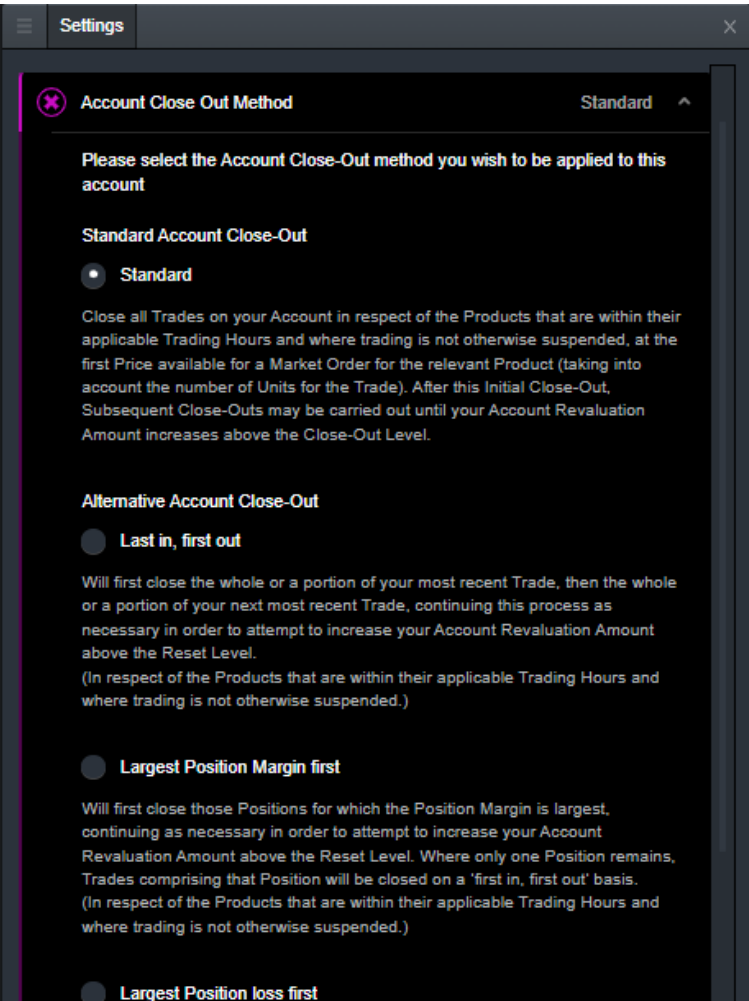

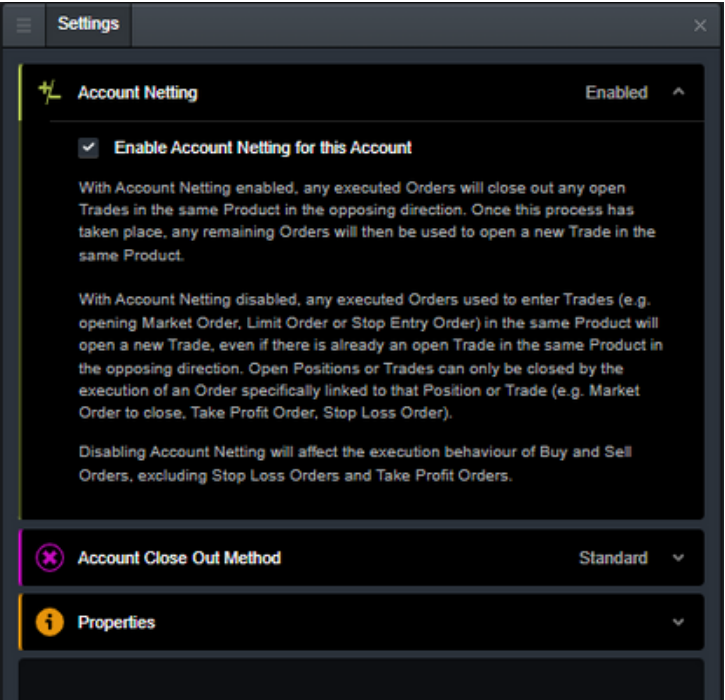

- a. Boundary orders allow you to specify a range or 'boundary price' that you're willing to accept to execute a market order, in the event of gapping or slippage in volatile markets
- b. Choose whether to set your positions on forward instruments to auto rollover when they reach expiry
- c. Choose whether to apply one-click trading
- d. Customise your stop-order trigger settings
- e. Record the size of the last order ticket, or create default placement of stop-loss and take-profit orders

16.b Account settings

When account netting is activated, an open position is closed when you place an order in the opposite direction on the same instrument. When account netting is deactivated, you can place a long position and a short position on the same instrument at the same time (known as hedging).

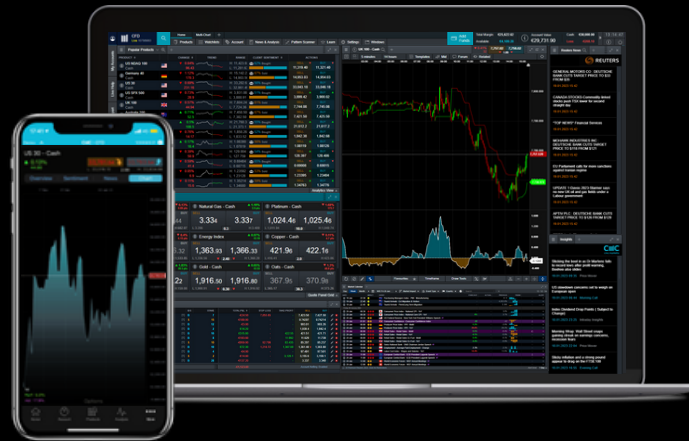

Select your preferred account close-out method. Choose between ‘standard account close-out’ or ‘alternative account close-out’ (‘last in, first out’, ‘largest position margin first’ or ‘largest position loss first’).

The screenshot shows the CMC Markets trading platform interface. On the left is a vertical sidebar with icons and labels: a profile icon, 'My Accounts', 'Live Help', 'Support', 'CMC Pro', and 'Funding'. The main header bar contains a search icon, a 'CFD Live 10788983' status, and navigation tabs: 'Home', 'Multi-Chart', 'Trade Signals', 'Sentiment', '+', 'Products', 'Watchlists', 'Account', 'News & Analysis', 'Pattern Scanner', 'Learn' (highlighted with a blue box), a settings gear, and a calendar icon. A dropdown menu for the 'Learn' tab is shown on the right, listing: 'Quick Start Guide', 'Welcome Tour', 'Platform Tour Videos', 'How to Trade', and 'Live Trader Events'. Blue circles with letters 'a' through 'i' are placed around the interface, with lines pointing to specific elements. A list of descriptions for these letters is provided on the right side of the page.

View our platform quick start guide, introductory welcome tour, and access our educational video series, under the 'Learn' menu. On the top left, the profile icon opens a menu that includes live help directly within the platform, and a funding tab where you can add or withdraw funds to/from your trading account

- a. Manage your live and demo trading accounts
- b. Chat with a member of our customer service team to get information and instant help with your trading account
- c. Browse our support section and view our FAQs
- d. Fund your trading account or withdraw funds
- e. Get a quick overview of the core features and functions of our trading platform
- f. Quickly discover commonly-used features within the platform
- g. Watch platform tour videos explaining how to best use our many tools and features
- h. Learn more about different trading strategies to help maximise your trading potential
- i. Develop your trading skills by attending online webinars presented by our market experts

CFD platform start guide

Please note: the platform is equipped with more features than we've haven't highlighted in this guide. Find out about these additional features from our dedicated YouTube channel, or by contacting our customer service team.
