

## Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Spread bets are offered by CMC Spreadbet plc (“CMC”), a company registered in England and Wales, number 2589529. CMC Spreadbet plc is authorised and regulated by the Financial Conduct Authority in the United Kingdom, register number 170627. Call 020 7170 8200 or go to [cmcmarkets.com](http://cmcmarkets.com) for more information.

This document was last updated on 9 August 2018.

You are about to purchase a product that is not simple and may be difficult to understand.

## What is this product?

### Type

A spread bet is a leveraged contract entered into with CMC on a bilateral basis. It allows an investor to speculate on rising or falling prices in an underlying market such as a share, currency, commodity or index.

An investor has the choice to buy (or go “long”) the spread bet to benefit from rising prices in the underlying market; or to sell (or go “short”) the spread bet to benefit from falling prices. The price of the spread bet is derived from the price of the underlying market price, which may be either the current cash price or a future price. For instance, if an investor is long a spread bet and the price of the underlying rises, the value of the spread bet will increase - at the end of the contract CMC will pay the difference between the closing value of the contract and the opening value of the contract. Conversely, if an investor is long and the price of the underlying falls, the value of the spread bet will decrease - at the end of the contract they will pay CMC the difference between the closing value of the contract and the opening value of the contract. A spread bet referencing the underlying future price works in exactly the same way except that such contracts have a pre-defined expiry date – a date upon which the contract either automatically closes or must be rolled into the next period. The leverage embedded within all spread bets has the effect of magnifying both profits and losses.

### Objectives

The objective of the spread bet is to allow an investor to gain leveraged exposure to the movement in the value of the underlying index (whether up or down), without actually needing to buy or sell in the underlying market. The exposure is leveraged since the spread bet only requires a small proportion of the notional value of the contract to be put down upfront as initial margin and is one of the key features of trading spread bets.

By way of example, if an investor buys a spread bet worth £1 per point with an initial margin amount of 5% and an underlying index price of 6000, the initial investment will be £300 (5% x 6000 x 1). The effect of leverage, in this case 20:1 (1 / 5%) has resulted in a notional value of the contract of £6000 (£300 x 20). This means that for each 1 point change in the price of the underlying index so the value of the spread bet changes by £1. For instance, if the investor is long and the market increases in value, a £1 profit will be made for every 1 point increase in that market. However if the market decreases in value, a £1 loss will be incurred for each point the market decreases in value. Conversely, if an investor holds a short position, a profit is made in line with any decreases in that market, and a loss for any increases in the market.

Undated spread bet contracts do not have an expiry date and are therefore open-ended but an overnight Holding Cost is charged. A forward contract has a pre-defined expiry date where the spread bet is either cash settled (closed) or rolled into the next forward contract, - i.e., from a January expiry into a February expiry. Rolling is at the discretion of the investor. There is no recommended holding period for either and it is down to the discretion of each individual investor to determine the most appropriate holding period based on their own individual trading strategy and objectives.

Failure to deposit additional funds in the case of negative price movement may result in the spread bet being auto-closed. This will occur when losses plus the margin required for the product exceed the cash deposited. CMC also retains the ability to unilaterally terminate any spread bet contract where it deems that the terms of the contract have been breached.

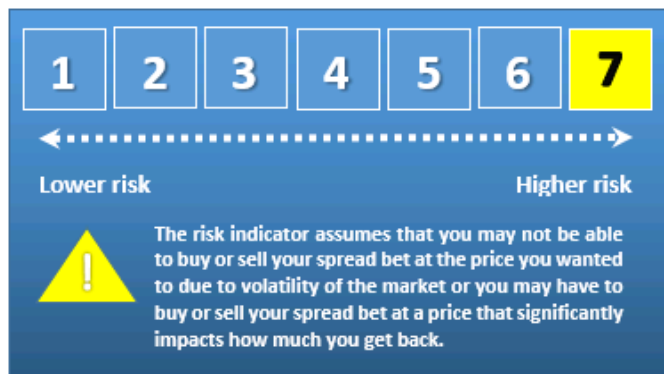

### Intended Retail Investor

Spread bets are intended for investors who have knowledge of, or experience with, leveraged products. Likely investors will understand how the prices of spread bets are derived and the key concepts of margin and leverage. They will understand the risk/reward profile of the product compared to traditional share dealing, and desire short-

term, high-risk exposure to an underlying asset. Investors will also have appropriate financial means, hold other investment types and have the ability to bear losses of the total amount invested.

## What are the risks and what could I get in return?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance of the product at a very high level.

Spread bets are complex instruments and come with a high risk of losing money rapidly due to leverage. Between 74-89% of retail investor accounts lose money when trading spread bets with this provider. You should consider whether you understand how spread bets work and whether you can afford to take the high risk of losing your money. There is no capital protection against market risk, credit risk or liquidity risk.

Market conditions may mean that your spread bet trade is closed at a less favourable price, which could significantly impact how much you get back. We may close your open trade if you do not maintain the minimum margin that is required, or if you contravene market regulations. This process may be automated. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section "what happens if we are unable to pay you"). The indicator shown above does not consider this protection.

### Performance scenarios

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

What you get will vary depending on how the market performs and how long you hold the spread bet. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The following assumptions have been used to create the scenarios in Table 1:

Spread bet (held intraday)		
Index opening price:	P	7000
Bet size (£/point):	TS	5
Margin %:	M	5%
Margin Requirement (£):	$MR = P \times TS \times M$	££1,750
Notional value of the trade (£):	$TN = MR/M$	£35,000

Table 1

LONG Performance scenario	Closing price (inc. spread)	Price change	Profit/loss	SHORT Performance scenario	Closing price (inc. spread)	Price change	Profit/loss
Favourable	7175	2.5%	£875	Favourable	6811	-2.7%	£945
Moderate	7142	2.03%	£710	Moderate	6853	-2.1%	£735
Unfavourable*	6811	-2.7%	-£945	Unfavourable*	7175	2.5%	-£875
Stress*	6419	-8.3%	-£2,905	Stress*	7609	8.7%	-£3,045

\*Losses will be limited to your account value.

The performance figures above do not include the costs shown below. If you have been sold this product by someone else, or have a third party advising you about this product, these figures do not include any cost that you pay to them. The figures do not take into account your personal tax situation, which may also affect how much you get back.

### What happens if CMC Markets UK plc is unable to pay out?

If CMC is unable to meet its financial obligations to you, you may lose the value of your investment. However CMC segregates all retail client funds from its own money in accordance with the UK FCA's Client Asset rules. CMC also participates in the UK's Financial Services Compensation Scheme (FSCS) which covers eligible investments up to £50,000 per person, per firm. See [www.fscs.org.uk](http://www.fscs.org.uk).

### What are the costs?

Depending on the product you trade, you may incur some or all of the following costs:

**This table shows the different types of cost categories and their meaning**

<b>Undated and Forwards</b>	<b>One-off entry or exit costs</b>	<b>Spread</b>	The difference between the buy price and the sell price is called the spread. This cost is realised each time you open and close a trade.
<b>Undated only</b>	<b>Ongoing costs</b>	<b>Daily holding cost</b>	An overnight holding cost is applied each night that your position is held. This could be a credit or debit depending on the product you are trading.
<b>Forwards Only</b>	<b>Other costs</b>	<b>Rollover costs</b>	We charge you to roll over a futures contract into the next month, or quarter, equal to half the applicable spread to open and close a trade.

### How long should I hold it and can I take money out early?

Spread bets are intended for short term trading, in some cases intraday and are generally not suitable for long term investments. There is no recommended holding period, no cancellation period and therefore no cancellation fees. You can open and close a spread bet at any time during market hours.

### How can I complain?

If you wish to make a complaint, you should contact our Client Management Team on 020 7170 8200, by emailing [clientmanagement@cmcmarkets.co.uk](mailto:clientmanagement@cmcmarkets.co.uk) or in writing to CMC Markets UK plc, 133 Houndsditch, London EC3A 7BX. If you do not feel that your complaint has been resolved satisfactorily, you may refer your complaint to the Financial Ombudsman Service (FOS). See [www.financial-ombudsman.org.uk](http://www.financial-ombudsman.org.uk) for further information. If your complaint is about an advisory or discretionary manager acting on your account, please contact the firm providing the service.

### Other relevant information

If there is a time lag between the time you place your order and the moment it is executed, your order may not be executed at the price you expected. Ensure your internet signal strength is sufficient before trading.

The Legal Documents section of our website contains important information regarding your account. You should ensure that you are familiar with all the terms and policies that apply to your account.

The Product Overview on our platform contains additional information on trading a spread bet. Additional information on costs can be found on our website.
